

## PARSLEY

ITALIAN HERB

Your packet contains Italian Parsley herb seeds. These seeds will produce large, tasty Parsley plants ready to harvest in 75-99 days after planting.

### Planting Instructions:

Find a small spot (up to 5 sq. feet) with sun exposure (or indoors in pots). Spread seeds evenly and do not bury; simply compress into the surface of the soil. Keep soil moist until seedlings are 4-6" high

### When to plant:

In Spring, wait until frosts are past. You can start indoors in pots 6-8 weeks prior to planting. You can also plant in summer, but you may have to water more. Enjoy!

## WILDFLOWER MIXTURE

**Seed Contents:** Bachelor Buttons, Baby's Breath, Chinese Forget Me Not, Blue Flax, Siberian Wallflower, Garland Chrysanthemum, Cosmos Sensation Mix, Sweet William Single Mix, Treemallow, Scarlet Flax, Alyssum Tail

### Planting Instructions:

Plant in early Spring after the last frost date for your area, in well tilled soil, raked smooth. Choose a sunny location. Distribute seed evenly and rake lightly into the soil. Regular watering is essential to establish plants. During the growing season, spot weed as needed. In fall or after frost, cut down or mow area to promote seed development for the next year. Over- seeding each year is recommended to renew annuals and reseed areas of sparse growth. Your wildflowers will grow the following Spring or growth season.
